

Technical note: New Fanmaster Element Pins

We have further improved the popular Fanmaster elements by updating the design of the electrical connection pins. These are now a single piece design that is stronger and more reliable than before. They also feature a tapered end to ease fitting of the connector.

The pin that the wire connects to is slightly larger than before so you may need to adjust/widen the contacts slightly to enable them to fit. This can easily be achieved with a small screwdriver. However, please make sure that the wires are snug/well fitted rather than loose. We suggest that the wires are test fitted BEFORE the elements are fitted as the element ends are hard to access once fitted.

If you have any questions regarding this matter then please do not hesitate to contact us on info@apuljackelectronics.co.uk or 01278 588 922.
